

2005 Legislative Proposals – ITIB/CIO/VITA [draft 10/07/04]

***I. Revisions to ITIB/CIO/VITA Enabling Statutes**

A. Raise the threshold for project review by CIO from \$100,000 to \$500,000 because there is little or no value added for CIO to review projects under \$500,000

B. Repeal the Virginia Information Providers Network (VIPNet) and move the substance of VIPNet into VITA's powers and duties

***NOTE: VITA drafted as a single bill and submitted to the Secretary of Technology on 9/1/04.**

***II. Wireless E-911 Policy Board/Public Safety Communications (PSC) Division**

Amend Wireless E-911 Services Board and VITA's PSC Division per OAG recommendations and Board's review and approval at its September 15 meeting

***NOTE: VITA drafted as a single bill and submitted to the Secretary of Technology on 8/31/04.**

III. JCOTS/Integrated Government Advisory Committee (sent 9/8/04)

Virginia Public Procurement Act (VPPA)

- Eliminate a preference in the VPPA for any particular procurement method
- Amend state agencies' authorization to purchase from online public auctions and through cooperative procurement arrangements to require CIO approval for IT goods and services
- Authorize VITA to conduct an Alternative Dispute Resolution (ADR) pilot project

Freedom of Information Act (FOIA)

- Enact a closed meeting exception in FOIA for the Public-Private Education Facilities and Infrastructure Act (PPEA) which parallels that provided for the Public-Private Transportation Act (PPTA)

Electronic Meetings Pilot Project

- Extend the sunset clause for electronic communication meetings from July 1, 2005, to July 1, 2007, or strike the sunset clause entirely and codify this "Section One" bill

***IV. Proposed Language Amendments to the Appropriations Act (House Bill 5001)**

A. Strike language authorizing Governor to increase VITA's maximum employment level (MEL) and bring VITA under General Provisions for internal service funded agencies.

B. Strike language requiring the Department of Human Resource Management to review VITA's compensation actions and make an annual report of same to the money committees, etc.

C. Expand the definition of VBMP data in the appropriation act to include "road centerlines" or other data that is currently developed and supplied by local governments to the VBMP program. A critical requirement would be that any data that is included in the program must meet state standards (including a currency standard - i.e., less than one year old). This process would provide for a single (no overhead) license and would allow government to government data sharing without paperwork.

D. Specify the Wireless E-911 fund's annual contribution to help support the underlying Virginia Base Mapping Program and digital road centerline files. (See Funding Priority 2 below.)

E. Amend "Goods and Services" General Provisions to match the Code requirement that the CIO, not the ITIB, approve procurements for major IT projects. (Corrects error in 2004 Session.)

***V. Proposed Dollar Amendments to the Appropriation Act (House Bill 5001)**

<i>Proposed Amendment—Priority and Description</i>	<i>\$ (2 yrs)</i>
1. Relocate VITA data center and offices to safe, secure and efficient facility	3.20
2. Enhance support of VGIN – update base mapping and central address file	4.59
3. Build incident management capability to prevent/contain cyber attacks	1.57
4. Enhance IT strategic planning, project mgt performance & decision making	3.14
5. Expand E-Government, including online services for citizens and business	2.79
6. Build comprehensive central planning capacity for major IT projects	7.00
7. Support small agency desktop services	1.04
8. Fund transition costs of incoming administration	.35
<u>TOTALS</u>	\$23.68

***NOTE: IV and V will be submitted to DPB on 10/13/04.**
